FAQs

Q - What Trap is recommended for use with this bathtub?

A - We recommend using an exposed bath trap with this bath tub. The trap will require a 1 1/2" BSP connection to connect with the waste. A range of finishes are available in the Tavistock bathing collection

Q - Is this bathtub supplied with a waste?

A - No, bathtub click and chain wastes can be purchased separately from the Tavistock brochure in a range of finishes.

Q - What colour is the overflow trim?

A - The bathtub is supplied with a pre drilled, neutral overflow hole.

Q - Do I need to purchase a bath tub overflow kit for this bath tub?

A - Yes, an overflow and waste kit can be purchased from the Tavistock bathing collection in a range of finishes.

Q - What filling methods are recommended for this bathtub

A - We recommend using a deckmounted bath filler/bath shower mixer with tap shrouds.

Q - Is this bathtub supplied with feet?

A - No, traditional feet can be purchased separately from the Tavistock brochure in a range of finishes.

Q - How heavy is this bathtub?

A - The unfilled weight is 28KG, the filled weight is 193KG. A structural engineer should be consulted to ensure that your floor is strong enough to support the weight of a filled bathtub.

Q - What material is used to make this bathtub?

A - This bathtub is made from a double skin of 3.2mm acrylic, each skin is reinforced by a double layer of insulating fibreglass and resin. The bottom of the bath tub is reinforced using a 6mm thick MDF base board.

Q - Are the feet adjustable?

A - Yes, the height of the feet is adjustable by a range of over 30mm.

Q - What is the overall capacity of the bathtub?

A - 165 Litres.

Q - Are the tap holes pre drilled?

A - Our bath tubs are all supplied with undrilled tap decks

All of our bath tubs conform with BS EN 14156 Class 1 & Class 2
