Installation Instructions & User Guide

Please leave these instructions with the end user

Product Code: R 3/4 TC (D2)

Specifications

Dynamic Water Pressure (bar)

Min: 0.2 bar

Max: 5.0 bar

Maximum Static Pressure: 10.0 bar

Tools You'll Need

Tape Measure

Crosshead Screwdriver

Adjustable Spanner

Pack Contents

Prior to Installation

All products manufactured and supplied by Bristan are safe provided they are installed, used correctly and receive regular maintenance in accordance with these instructions.

This product has been tested to the Water Regulations Advisory Scheme (WRAS) and satisfies the requirements of the Water Supply (Water Fittings) Regulations 1999 and current bylaws.

The replacement handles have a high quality finish and should be treated with care to preserve the visible surfaces.

All surface finishes will wear if not cleaned correctly, once your product has been used, dry it with a soft cloth. Your taps should be regularly cleaned with warm water, a mild pH-neutral liquid soap and polished with the microfiber cloth. This is gentle yet effective cleaning without scratching.

Any residues from soap and toothpaste can cause blemishes if not rinsed straight after use. Avoid using abrasive cloths, scouring pads, scrub sponges, steel wool or anything similar.

This product must not be modified in anyway as this will invalidate the guarantee.

Installation

IMPORTANT
Ensure you isolate water supply

Remove the existing handles and valves.

Insert Selection

Insert the valve from the kit, if the thread fits follow the assembly chart on 1/2" 5412. See overleaf for chart.

If the thread in the body is too large, then try the 3/4" 5412 tap insert, if it fits follow 3/4" 5412 section.

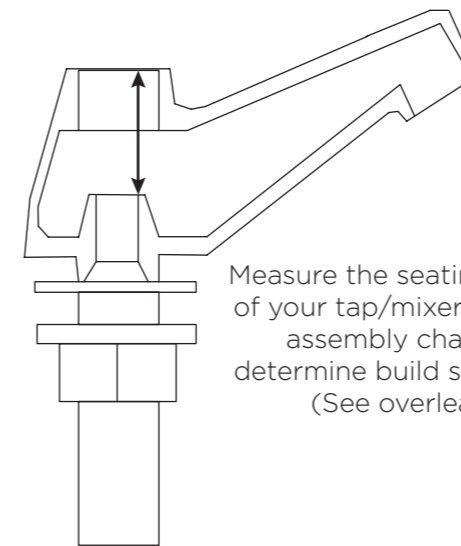

If neither fit use the 3/4" 1010 tap insert and follow the 3/4" 1010 section.

IMPORTANT
Ensure the tap insert is screwed right to the top of the valve body.

Spacer/Screw Selection

Measure the seating depth of your tap/mixer and see assembly chart to determine build structure. (See overleaf)

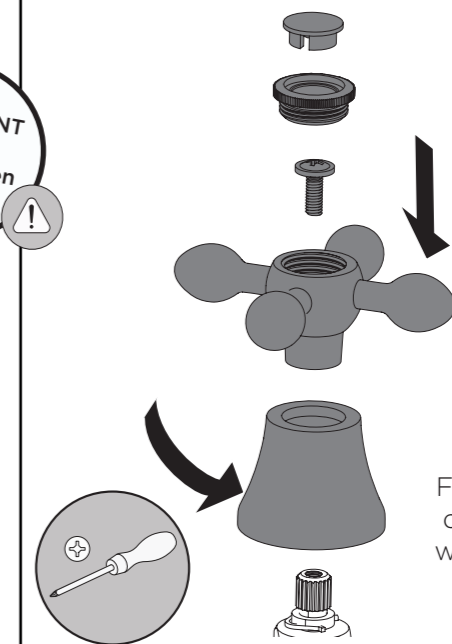

Remove the mini screw and rubber washer from the base of the valve. Fit the appropriate amount of spacers and fix with suitable screw. (See overleaf)

Installation Continued

Tighten the valve into the tap body.

IMPORTANT
Do not over-tighten

Fit the shroud and handle to the valve secure with screw. Fit indicator and cap.

At Bristan, we want to make things as easy as possible for our customers. That's why we offer solid guarantees on all our products, effective from the date of purchase, to give you peace of mind.
