Please note: When choosing your panel sizes we recommend allowing access of approx. 500mm.

Ultimate SE Space Efficient Curved Panel Walk-In Shower Configurations

Designed to fit a dedicated bow fronted Concept tray and available in three sizes. The required fittings, except for the wall post, are the same as those for the equivalent flat panel enclosures. When using the smaller 700mm panel we recommend using either the angled or ceiling fixing as the standard fixing kits may compromise the showering experience, it is also recommended that a hinged deflector panel is fitted to the 700mm panel option to provide protection from over-spray.

Recessed

**Corner

****For corner or three sided enclosures on bowed fronted tray, use a standard 700mm flat panel for the side panel/s.**

Deflector Panels

Designed to contain over-spray and splashing within your designated showering area and are especially useful where smaller front panels are used. All Ultimate deflector panels are retro-fittable so only need to be purchased if found necessary.

Fixed Deflector Panel: Supplied with fixings to connect to standard fixing kit. This 255mm fixed deflector panel provides a 90° angled barrier to prevent splashing outside of the showering area. **Not suitable for use with angled or ceiling fixing kit.**

Fold Away Hinged Deflector Panel:

Designed to fit neatly behind the front panel when not in use, the 300mm Fold-Away deflector panel stops at a 45° angle to the front panel when in use to provide the optimum protection from over-spray. Available in both 8 & 10mm glass thickness and featuring heavy duty hinges and crystal clear vertical seal.

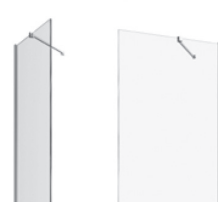

Hinged Deflector Panel: Available in 300 and 400mm widths in both 8 & 10mm glass thickness, the hinged deflector rotates through 180° for easy access. Featuring heavy duty hinges with crystal clear seals for minimalist appearance.

NB All Ultimate Hinged Deflector Panels are handed please suffix codes with LH or RH. All illustrations show Right Hand version.
