## Quality design for international tastes

RAK Ceramics product development has created a very wide range of products with carefully finished details and quality design to suit international tastes, incorporating the latest rimless technology.

Carefully designed and engineered with the aid of the latest 3D CAD softwares and prototyped with 5 axis CNC machines, RAK Ceramics Sanitaryware range has the perfect solution for your bathroom, whatever you have imagined.

## Rimless technology

RAK Ceramics delivers the ultimate in technology for bathroom suites. Based on similar design specifications to sanitaryware in hospitals and medical centres, RAK Ceramics Rimless water closets allows you to experience the same high standards of hygiene in your own home.

RAK Ceramics continues to set new standards of hygiene and water efficiency in the sanitaryware industry, with uniquely engineered water flushing systems that effectively remove waste, helping to keep bathrooms fresh and hygienic.

### **WATER SAVING**

Using just 4 litres for the full flush and 2.5 litres for the half flush, water usage is reduced by a third.

### **HYGIENIC AND EASY TO CLEAN**

The water closets have no rims to harbour germs, making cleaning quick, easy and more hygienic.

### **SILENT FLUSH**

Rimless technology allows a faster and more silent flush.

### **EFFICIENT DESIGN**

Design and efficiency can be successfully combined. Water flows vertically and horizontally, before flushing the entire inner surface of the bowl, without splashing.

## Hidden fixation systems

Our wall hung and back to wall products are benefitting of the collaboration with Fischer Group, one of the industry leaders. The use of the most innovative Fischer fixing systems, is allowing us design freedom on the ceramic, better aesthetics and more safety for the installer.

The Hidden Fixation System is comfortable and time saving, in fact one-man installation is made possible by the clip system that keeps the ceramic held up during the installation.

## Touchless flushing

Enjoy the same hands free, germ free experience of commercial restrooms. With the new RAK Ceramics Touchless Flushing System, this same ease of use and minimal spreading of germs has finally expanded to the home use toilets. A sensor module mounts underneath the toilet's cistern lid and runs on four AA batteries. It utilizes emerging sensing technology, which projects an electromagnetic field that is both extremely accurate and reliable.

This type of sensor detects the user in the projected field and initiates the dual flush: 6 Liters keeping the hand above the spot, or 3 Liters waving the hand.

**DUAL FLUSHING:**

-  Still hand above the indicated spot for *full flush*.
-  Waving hand above the indicated spot for *half flush*.

**Technical Information:**

-  Sensor area is within 40mm~60mm from the surface of the cistern lid; effective diameter of the sensor area is within 100mm.
-  Battery life: around 2 years for family use, and 1 year for commercial using.
-  Override lateral push button in case of failed battery.
